- The time can be set from 00:00 - 99:59 minutes, or 00:00 - 99:59 hours.
- Volume is adjustable. It can be set manually using the +/increase or -/decrease buttons.
- Easy to clean ABS and Stainless Steel construction.
- Mounting brackets and hardware included.

Operation Instruction

1. Press ON/OFF button to turn the unit on The channels will all display 88:88 for 3 seconds while the unit is testing itself to ensure it is operating correctly. Press ON/OFF button for 2 seconds to turn the unit off.

2. To Set Timers:
   a. Press the ⊙ button, then the corresponding channel number (1-12) you are changing. The second set of "00" after the colon will begin to flash. Use the +/- buttons to adjust the seconds.
   b. Next, press the corresponding channel number (1-12) and the first set of "00" will begin to flash allowing you to change the minutes. Use the +/- buttons to adjust the minutes.
   c. Press the ⊙ button to return to the main display.
   * Note: When entering the time setting it will not affect any timer currently in use.

3. Change channel from Minutes:Seconds (MM:SS) to Hours:Minutes (HH:MM)
   a. While the timer is off, press and hold the ⊙ button for approximately 2 seconds.
   b. To change the display press the corresponding channel number (1-12); H-N indicates Hours:Minutes and N-S indicates Minutes:Seconds.

4. To Set Reminder Alarm(s):
   a. Press the ⛏ button.
   b. AL-1 appears, press the corresponding channel number (1-12) you are setting the alarm for. Then press +/- to adjust the time.
   c. Press the ⛏ button to go to AL-2 and use +/- buttons to adjust the time.
   d. Press the ⛏ button to go to AL-3and use +/- buttons to adjust the time.
   e. Once set AL-1, AL-2 and AL-3 will flash and the alarm will beep until the corresponding channel number is pressed. The timer will continue to count down while the reminder alarms are active.
   f. When the countdown ends and the (End) state is displayed, press +/- to adjust the sound.
   * Note: Leave time display at 00:00 if you do not want to use multiple alarms.

5. START or STOP a timer

Press the corresponding channel number (1-12) for the timer you would like to start. The colon will flash indicating the timer has been started. Press the corresponding channel number (1-12) for 2 seconds to reset the individual timer.
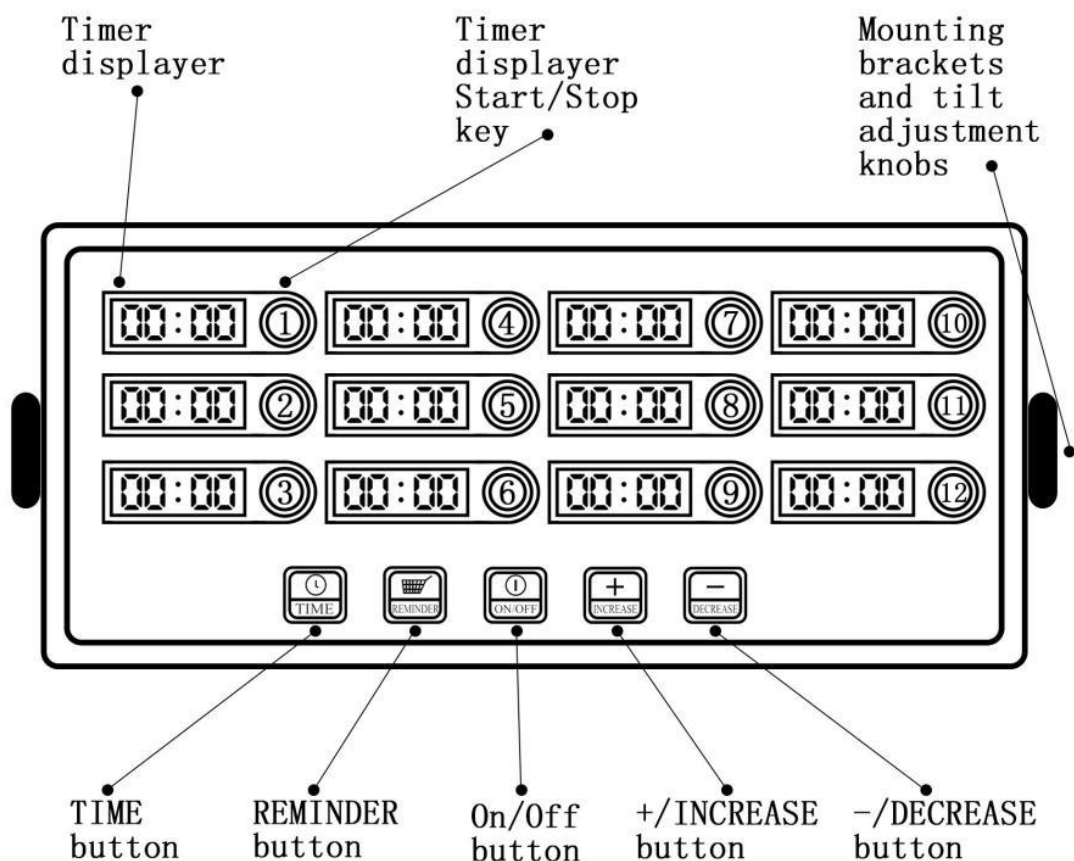

6. At the end of the timer press the corresponding channel number (1-12) to end the alarm. It will then reset to the programmed value.

7. Adjustment of volume:

Use the + and - buttons to adjust the volume from the main timer screen. The selected volume will automatically be saved.

Note: There is no alarm sound on the lowest volume setting.

Care and Maintenance:

• The unit is made of ABS and stainless steel and is not waterproof.
  When cleaning, use a wet cloth with oil degreaser and wipe.
  Do not submerge in water. **Do not** use in dishwasher.

• **Do not** use hard objects to press buttons.
  Using items other than a finger may result in scratching the unit and screens.

• Please ensure the mounting brackets are securely attached to the wall before
  affixing the timer to the brackets.

• Read the instruction manual carefully before using this device.

• **DO NOT** open or disassemble the timer.
  Doing so may result in electrical shock, and will void the warranty.
